Translocating hedgerows to provide suitable visibility for construction vehicular movements

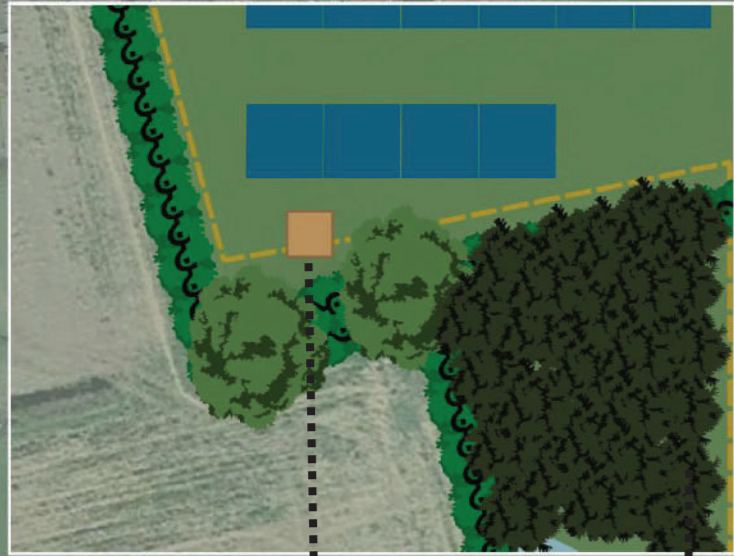

Existing hedgerows will be enhanced through less frequent management and infilling planting

Existing hedgerows around the site to provide screening

New stretches of native hedgerows planted to create new habitat.

New trees plantation to create new habitat.

Mammal gates strategically placed around the site at fence corners to allow passage of badger

New pond to create new habitat.

Boxes for Birds/Bats for additional enhancement

Deer fence to **protect new vegetation**

Native wildflower meadow can be maintained by managed sheep grazing.
